

Environmental Sustainability Goals

E-Waste Reduction - December 31, 2024

INW Solutions will implement a comprehensive e-waste recycling program, aiming for a 20% reduction in electronic waste produced by the end of the next fiscal year. This will be accomplished by promoting the responsible disposal of old IT equipment through recycling programs, and encouragement of customers to return obsolete products for proper recycling. INW will also explore partnerships with certified e-waste recycling facilities.

Energy Efficiency – December 31, 2025

By improving energy efficiency in daily operations, INW Solutions seeks to reduce overall energy consumption by 10% within the next two years. INW will conduct an energy audit to identify areas for improvement and take the time to educate employees on the benefits of powering off devices and lights when not in use. INW will also explore the implementation of energy-efficient appliances and lighting.
